

TABLE PURSUANT TO CT6.42# - YARDING/SKIDDING REQUIREMENTS (06/2010)

<u>YARDING/SKIDDING REQUIREMENTS</u>	<u>PAYMENT UNITS</u>
Conventional Skidding Systems	All
Skidding machinery will be restricted to sustained slopes less than 35%.	All
Skidding machinery is restricted to approved skid trails, except for single passes to access felled timber. Equipment is to provide at least one-end suspension. Use existing trail system as much as possible. Equipment will cross ephemeral draws and channels at sites preapproved by the Forest Service and crossings will be minimized. All embedded wood will be retained. Conventional System skid trail spacing will average 100 feet apart, except where converging or if skid trails already exist. Log landings and transfer points shall be limited to existing roads and turnouts, unless otherwise agreed to in writing.	All
All skidding equipment shall avoid lithosol and meadows unless no other location is practical. When necessary use the edge of the meadows.	All
